International Journal of Fracture

CONTENTS OF VOLUME 84 (1997)

Vol. 84, No. 1, 1997

Foreword		v–vi
Determination of the full elastic-plastic stress field of a tensile crack by minimization of the complementary energy	LI JIA	1–17
Mixed-mode separation in dynamic fracture mechanics: New path independent integrals	M. ATTIGUI and C. PETIT	19–36
The stress intensity factor for a cracked stiffened sheet repaired with an adhesively bonded composite patch	C.N. DUONG and J. YU	37–60
The influence of plasticity in hydraulic fracturing	PANOS PAPANASTASIOU	61–79
Local constraint near fatigue cracks in alloys and particulate composites	D.L. DAVIDSON and R.C. McCLUNG	81–98
Errata		99

Vol. 84, No. 2, 1997

Integral formulation for elastodynamic *T*-stresses	J. SLADEK, V. SLADEK and P. FEDELINSKI	103–116
Interaction effect of stress intensity factors for any number of collinear interface cracks	NAO-AKI NODA and KAZUHIRO ODA	117–128
Stress intensity factors for cracks in bolted joints	S.H. JU	129–141
Analysis of a circular arc-crack in piezoelectric materials	Z. ZHONG and S.A. MEGUID	143–158
Correlation of fatigue crack propagation in polyethylene pipe specimens of different geometries	A. SHAH, E.V. STEPANOV, A. HILTNER, E. BAER and M. KLIEN	159–173
Uncoupled numerical method for fracture analysis	J.C.W. VAN VROONHOVEN and R. DE BORST	175–190

Three-dimensional crack problem analysis using boundary element method with finite-part integrals	T.Y. QIN, W.J. CHEN and R.J. TANG	191–202

Vol. 84, No. 3, 1997

Quasi-statically growing crack-tip fields in elastic perfectly plastic pressure-sensitive materials under plane strain conditions	W.J. CHANG, M. KIM and J. PAN	203–228
Stress-strain state near a straight-through transverse crack tip in a special multi-sheet plate structure	V.V. SILVESTROV	229–236
Local and global instabilities associated with continuing crack extension in dissipative solids	BIJAN OMIDVAR and MICHAEL P. WNUK	237–260
A finite element approach to anisotropic damage of ductile materials in large deformations. Part I: An anisotropic ductile elastic-plastic-damage model	JONG GYE SHIN, IN SIK NHO and SAHNG JUN YIM	261–277
A finite element approach to anisotropic damage of ductile materials in large deformations. Part II: Finite element formulation and applications	JONG GYE SHIN, IN SIK NHO and SAHNG JUN YIM	279–295

Vol. 84, No. 4, 1997

Out-of-plane stretching and tearing fracture in ductile sheet materials	C.M. MUSCAT-FENECH and A.G. ATKINS	297–306
Polymer reinforcements for retarding fatigue crack growth in metals	ALAN T. ZEHNDER, D.V. SWENSON and THOMAS J. PIENKOS	307–323
Finite deformations at the vertex of a bi-material wedge	C.Q. RU	325–350
Regularized BE formulations for the analysis of fracture in thin plates	A. FRANGI	351–365
Fracture initiation at sharp notches under mode I, mode II, and mild mixed mode loading	MARTIN L. DUNN, WAN SUWITO, SHAWN CUNNINGHAM and CHRISTIAN W. MAY	367–381
Effects of strain hardening on quasi-static fracture in elasto-plastic solid represented by modified yield strip model	MICHAEL P. WNUK and BIJAN OMIDVAR	383–403
